READING

Young people follow different paths after completing high school. Some enter university or start work immediately. Others take a gap year before continuing their education or careers.

What are some advantages of taking a gap year? Young people can spend time thinking carefully about their future. This may help them choose suitable studies or jobs. Additionally, they can travel or try new activities. Volunteer work, part-time jobs, or international experiences may teach useful skills and build confidence.

In contrast, taking a gap year also has some disadvantages. Graduation or full-time employment may be delayed. People can begin their careers later than friends of the same age. Another problem is that gap-year activities can cost a lot of money. Travel, housing, courses, and daily expenses may be difficult to afford, especially when a person has no regular income during that period without strong financial support from their families or other sources.
