

名前 _____ 日付 _____ / _____

QUESTION

Read the article below and summarize it in your own words as far as possible in English. Summarize it between 60 and 70 words.

以下の記事を読み、できる限り自分の言葉を使って英語で要約しなさい。60～70語で要約しなさい。

READING

Museums are exploring new ways to preserve memories of war as the number of people who directly experienced past conflicts continues to decline. One approach is to use artificial intelligence (AI) together with digital archives, holograms, and interactive systems. Testimonies, photographs, and recorded interviews can be stored as data, allowing visitors to ask questions and receive responses based on the experiences of people who lived through historical events.

Supporters believe this approach offers important benefits. First, these technologies can preserve valuable testimony for a very long time. Even after survivors are no longer able to speak in person, their stories can remain available to future generations. Another advantage is that advanced technology may attract younger visitors. Interactive displays and holograms can make historical information feel more immediate, encouraging students and young adults to become more interested in learning about war and its consequences.

However, critics raise a serious concern. AI systems may sometimes generate inaccurate information or responses that were never part of the original testimony. If these mistakes are not carefully checked, visitors could receive false impressions about historical events. In the worst cases, repeated errors could gradually distort public understanding of the past. Museums therefore need strict systems for checking sources and separating verified testimony from AI-generated content.

要約は2ページ目を書きます。記事の和訳は載せていません（読む練習のため）。答え合わせはQRから。

スマホで読み取ると、書いた英文をその場でAIが添削します。
