

名前 _____ 日付 _____ / _____

QUESTION

Read the article below and summarize it in your own words as far as possible in English. Summarize it between 60 and 70 words.

以下の記事を読み、できる限り自分の言葉を使って英語で要約しなさい。60～70語で要約しなさい。

READING

Fishing nets, lines, and traps are sometimes lost during storms or damaged while being used. Ordinary plastic equipment can remain in the sea for many years after it is abandoned. To reduce this problem, manufacturers are developing fishing gear made from materials that gradually break down in natural conditions but remain strong enough for normal use by fishing crews at sea.

Supporters say biodegradable gear could provide important benefits. If lost equipment breaks down over time, less plastic remains in the ocean and the amount of long-lasting marine waste may fall. Also, this can limit damage caused by abandoned nets and traps. Such gear may continue catching fish, turtles, or other animals after fishermen have lost control of it, but decomposition can shorten that dangerous period.

However, critics point out problems. Materials designed to break down may be weaker than ordinary plastic, especially after repeated exposure to salt water, sunlight, and heavy loads. Gear that fails too early can reduce catches or create safety risks. Manufacturing costs are also higher because producers need special materials and testing. These expenses may make the equipment difficult for small fishing businesses to purchase regularly.

要約は2ページ目に書きます。記事の和訳は載せていません（読む練習のため）。答え合わせはQRから。
