

名前 _____ 日付 _____ / _____

QUESTION

Read the article below and summarize it in your own words as far as possible in English. Summarize it between 60 and 70 words.

以下の記事を読み、できる限り自分の言葉を使って英語で要約しなさい。60～70語で要約しなさい。

READING

Farmers must remove weeds because they compete with crops for water and nutrients. However, weeding is demanding as it requires a lot of physical work. One new method to reduce this burden is to use robots equipped with artificial intelligence (AI). As the robots move through fields, the AI compares images of plants and decides which ones are weeds. The machines then pull out those plants or spray them with a small amount of weed killer. Supporters say AI weeding robots are beneficial. Farmers usually spray weed killers over large areas, including places where no weeds are growing. Robots can target individual weeds, so fewer chemicals are needed. There is another advantage. The machines can work for long periods without becoming tired. This could reduce the amount of difficult physical work done by farmers, especially on large farms where removing weeds by hand takes many hours. However, critics have concerns. AI systems may not always identify plants correctly. Young crops and weeds can look similar, and shadows or damaged leaves may make recognition more difficult. If a robot mistakes a crop for a weed, it may pull out the plant or spray it. Such errors could reduce the amount of food produced.

要約は2ページ目に書きます。記事の和訳は載せていません（読む練習のため）。答え合わせはQRから。

スマホで読み取ると、書いた英文をその場でAIが添削します。
