

名前 _____ 日付 _____ / _____

QUESTION

Read the article below and summarize it in your own words as far as possible in English. Summarize it between 60 and 70 words.

以下の記事を読み、できる限り自分の言葉を使って英語で要約しなさい。60～70語で要約しなさい。

READING

Large amounts of used clothing are collected by shops, charities, and local governments. Some items can be worn again, but damaged clothing is often burned or buried. Fiber-to-fiber recycling offers another option. In this process, old clothes are separated, cleaned, and broken down into fibers. The fibers are then used to make yarn and produce new fabric for clothing and other useful textile products.

Supporters believe this process has several benefits. First, it can reduce the amount of clothing sent to waste facilities. Since more damaged items are recycled, fewer of them need to be buried or burned. There is another advantage. Producing cotton and synthetic fibers requires large amounts of water, energy, and raw materials. These resources are needed before fabric can be produced and supplied to clothing companies. Using recycled fibers can therefore reduce the resources required to make new clothing.

However, critics point out a problem. Many clothes contain mixtures of cotton, polyester, and other materials that are difficult to separate. Buttons, dyes, and special coatings can also interfere with recycling. The resulting fibers may therefore be too weak for high-quality clothing, greatly limiting how they can be reused.

要約は2ページ目に書きます。記事の和訳は載せていません（読む練習のため）。答え合わせはQRから。
