名前 _____ 日付 ____／____

QUESTION

Read the article below and summarize it in your own words as far as possible in English. Summarize it between 90 and 110 words.

以下の記事を読み、できる限り自分の言葉を使って英語で要約しなさい。90〜110語で要約しなさい。

READING

In regions where wildfires have been aggressively suppressed for many years, forests can gradually accumulate large amounts of dry leaves, dead branches, and other flammable material. Preventing small fires may protect communities in the short term, but it also allows this fuel to build up on the forest floor. During prolonged dry periods, a single ignition can then spread quickly through the abundant vegetation. Strong winds and low humidity can make the situation worse, turning what might once have been a limited fire into a much larger and more intense wildfire that is difficult to control.

Severe wildfires can cause extensive damage to both people and the environment. Homes and other structures near forests may be destroyed, while wildlife habitat and vegetation can be lost over large areas. Large fires also require major emergency responses, including firefighting crews, aircraft, evacuations, and temporary shelters. These operations can place heavy financial pressure on local and national authorities. Communities may also face long recovery periods after a fire, especially when roads, utilities, or natural resources have been damaged. As fuel continues to accumulate, the cost and difficulty of responding to future fires may increase further.

One strategy for reducing this danger is prescribed burning. Land managers intentionally set small, controlled fires during periods when weather conditions are relatively stable, removing some of the vegetation that could otherwise fuel a severe wildfire. By reducing this material in advance, they can lower the intensity of future fires. However, prescribed burns also create risks. Smoke can affect the health of nearby residents, particularly people with respiratory problems. In addition, weather can change unexpectedly, and a controlled fire may spread beyond the intended area. Careful planning and monitoring can reduce these dangers, but they cannot eliminate them completely.

要約は2ページ目に書きます。記事の和訳は載せていません（読む練習のため）。答え合わせはQRから。

名前 _____　日付 _____／_____

1ページ目の記事を、90〜110語の英語で要約します。記事の言葉をそのまま写さず、自分の言葉で言い換えましょう。

解答欄

目安 90〜110語（1行に8〜9語ほど）

枠の中に書いてください

メモ（要点を3つ書き出してから、まとめます）

スマホで読み取ると、書いた英文をその場でAIが添削します。
